

JOB LADDER

JOB RECRUITMENT WEB APP

ABSTRACT

Job Ladder is a comprehensive job recruitment platform designed to streamline the hiring process for both employers and job seekers. Built on the robust MERN (MongoDB, Express.js, React.js, Node.js) stack and styled with the utility-first Tailwind CSS framework,

FEATURES ADDED

1. User Authentication: Secure login and registration system for job seekers, employers, and administrators.
2. Profile Management: Job seekers can create and update their professional profiles.
3. Job Posting: Employers can easily add and manage job listings.
4. Job Search and Applications: Job seekers can browse available positions and submit applications.
5. Applications Tracking: Both employers and job seekers can view and track application statuses.
6. Admin Dashboard: Powerful tools for platform management, including employer approval.
7. Responsive Design: Tailwind CSS ensures a seamless experience across all devices.

Job Ladder aims to enhance the recruitment process by providing a centralized platform that connects qualified candidates with potential employers, ultimately fostering efficient and effective job placements in today's competitive market.
